

Cultural Resources Responsibilities

- Coordinating and consulting with the Federal Highway Administration (FHWA), the State Historic Preservation Office (SHPO), local historic commissions, Tribal Historic Preservation Offices, other federal and state agencies, and other interested parties regarding impacts on historic properties.
- Performing or directing architectural and archaeological field surveys, evaluating the historical and archaeological significance of all properties within a proposed project impact area, and reviewing the project plans to identify and evaluate the project's affect to historically significant properties.
- Seeking alternatives to avoid, minimize, or mitigate impacts to historic properties.
- Providing assistance to state and federal agencies (for example, the evaluating the National Register eligibility of the Interstate System within Georgia for the FHWA).
- Maintaining and updating the Georgia Historic Bridge Survey.
